Experience

Coding Coach

Python, Java, and Scratch Instructor

8/2025 - Current

- Work with individuals from elementary school to high school, teaching them the fundamentals of programming
- Guide students through insightful coding projects that help build their understanding of the language
- Adapt lessons to cater to the students current skill level and pace to help them digest the given information

Home Depot Associate

Garden Associate

10/2021 -

Current

- Work closely with colleagues to assist customers and restock inventory in a hasty environment
 - Provide excellent customer service, answering product-related questions guiding customers to the best solution
 - Train new team members, sharing product knowledge and best practices to improve team efficiency
-

Education

Bachelor of Science in Computer Science, San Francisco State University, San Francisco, CA

5/2025

3.7 GPA

Associate of Science in Computer Science, Skyline Community College, San Bruno, CA

5/2022

Projects

All-In-One Productivity App | [Github](#)

Full Stack Developer

3/2025

- Created an app that centralizes a calendar, finance tracker and note taker all into one application
- Designed responsive, user-friendly interfaces through wireframing and a consistent design system
- Ensured smooth API integration and UI Quality through thorough front-end testing
- This project taught me the importance of organized, indexable file structures and consistent naming conventions
- **Technologies/Softwares:** React, Express.js, Node.js, MongoDB, Sass, Git, VS Code

iOS AI Book Summary App | [Github](#)

Full Stack Developer

12/2024

- Developed an iOS app that utilizes AI to generate book summaries, enhancing user engagement with key insights
- Integrated OpenAI's API to provide concise summaries for user selected books as well as book recommendations
- Designed and implemented a user-friendly and visually appealing user interface using SwiftUI for an engaging, smooth user experience
- **Technologies/Softwares:** Swift, Xcode, Git

Media Review Platform App | [Github](#)

Front End Developer

7/2025

- Made a web application that allows users to review their favorite video games while looking at a pixel perfect user interface
 - The intent of this project was to utilize web development best practices to help build a robust web application from front to back
 - Implemented a traceable, consistent design system with self explanatory naming conventions as well as experimenting with a new file structure used for larger projects
 - **Technologies/Softwares:** React, Sass, Git, Neovim
-

Skills: React.js, Java, Python, C, C++, HTML/CSS, Javascript, Swift, SQL, MongoDB, Node.js, AWS, Git

Languages: English, Spanish
